## **DETAILED ACTION**

### ***Response to Restriction Election and Traverse***

The examiner is in receipt of applicant's response to restriction requirement mailed 6/29/2004, which was received 7/20/2004. Acknowledgment is made to the election of Group I, which contains claims 1-12 (the examiner concurs with the applicant that claim 12 was inadvertently omitted from Group I).

Applicant's arguments regarding the restriction of Groups I and II were carefully considered, but were not found to be persuasive. Applicant argues that claim 11 contains a feature, which requires at least two applications. The examiner disagrees and notes that claim 11 refers to an access method and not an application. The examiner further notes that claim 9 only refers to one access method.

Furthermore, after careful review of the claims selected the examiner presents the following species election/restriction requirement.

### ***Species Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention Group I:

Group IA – 1,2,3,4,8,9,10,11, and 12

Group IB – 1,5,6, and 7

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
